Boost – This is an extended touch up. This extended touch up is preferred when you want to move up in fullness from the full set that you initially started with. Example: You started with our Demureset, but now you want our Couture set. Belashed Revamp – All new lash clients who currently have eyelash extensions on from another salon are required to start out with our Revamp. We do this because most times we see clients (with lashes from elsewhere) who's lashes need a lot more work than what we have time for with just a regular touch up. With the Revamp, we will go through lash by lash ensuring that everything is being lashed properly to make sure there is no damage once we take over. Leaving you with gorgeously healthy lashes!
